

TO :- VMS champions

SUBJECT: -VMS update February 2010

Very warm wishes for a fabulous 2010 to all the readers of VMS update. In this first edition for 2010, we have lot of interesting information to share with all of you. Please read on.

1. Time Sensitive:-

- a. We announced the TUDs in Americas in April 2010. It will be held in Chicago on 5th and 6th April, Dallas on 8th and 9th, Washington DC on 12th and 13th and New York on 15th and 16th. We are coming out with solid technology content in these TUDs that will interest our OpenVMS technical audience immensely. Watch out for additional details coming your way soon. HP acknowledges the support for these events from our ISV partners Software Concepts International and Nemonix Engineering. Visit them at :-

www.sciinc.com

www.nemonixengineering.com

- b. Mark your calendar for the hp technology@work symposium in Frankfurt from 27th to 29th April. OpenVMS will have

a.) speaker session.

b.) lab session

c.) demo session .

in this event this year! We are very excited about this event being the biggest for our European OpenVMS audience. Watch out for more on this. Will surely let you know when the registration open for this event.

- c. Connect has declared February as the OpenVMS month. The following are the webinars that are scheduled for our OpenVMS enthusiasts. Watch the Connect space for further details on these.

http://www.connect-community.org/members/blog_view.asp?id=511058

- i. Feb 10 15:00 GMT: Keith Parris will present a webinar on "Achieving the Highest Possible Availability in your OpenVMS Cluster". Registration is open at <https://www1.gotomeeting.com/register/466770737>.
- ii. Feb 11 02:00 GMT: Keith Parris will present a second "copy" of the webinar on "Achieving the Highest Possible Availability in your OpenVMS Cluster". Registration open at <https://www1.gotomeeting.com/register/394479824>.

More details will appear on the VMSblog and the Connect Event Calendar over the next couple days so you can have more information about the webinars and other events. If you have any questions or which to be involved send us an email at participate@viavms.com!

2. OpenVMS Engineering update :-

- a. The Office of Customer programs is pleased to announce the availability of OpenVMS Integrity and Alpha servers for open source activities. In continuation to our commitment to Open source, our objective for providing these systems is to encourage more members of the community to contribute to Open Source on OpenVMS. Especially those who do not have access to integrity systems currently. This environment consists of an OpenVMS Integrity server as well as an OpenVMS Alpha server loaded with development tools.

These systems can be used to :

- Port Open Source applications to HP OpenVMS on Integrity/Alpha in a side-by-side environment
- Validate Open Source applications on latest versions of the operating system and mixed-architecture clusters

How to get an Account ?

Please send a mail to openvms.programs@hp.com with the subject "Open Source Porting Account".

Please furnish the following details :

First Name :
 Last Name :
 Organization :
 E-mail Address :
 Products being ported :

You will get a response from the Office of OpenVMS customer programs detailing the next steps. Sign up and contribute to open source on OpenVMS.

- b. This link provides the list of supported options and versions for I/O cards and the systems.
http://bcs-io.corp.hp.com/supconfig.php?distro_vendor=HP&like=OpenVMS%20v8.3
- c. HP OpenVMS RMS Patch Kit Privilege Escalation Vulnerability:
 A potential security vulnerability has been identified with certain RMS (Record Management Services) patch kits for HP OpenVMS running on ALPHA platforms. The vulnerability could be locally exploited resulting in an escalation of privilege. For details refer:
http://www11.itrc.hp.com/service/cki/docDisplay.do?docId=emr_na-c02001423&admit=109447626+1265722163500+28353475

3. Partner Page :-

- a. JCC is pleased to announce release 3.2.4 of the JCC LogMiner Loader™. The Loader is a fast, powerful, flexible tool to reflect data changes from a source database to multiple targets. The source is an Rdb™ database. Targets can be other Rdb databases, Oracle® databases, a customer supplied API in XML

format, Tuxedo, or can use a JDBC class 4 driver to write to an SQL Server database or another compliant target. The Loader is extensively tested and tuned for all recent versions of these companion products.

For more information, please see <http://www.jcc.com/LML.htm> or send mail to info@JCC.com.

- b. PointSecure is pleased to announce that System Detective 8.5-5 is now available! This new version of System Detective includes:

- A new terminal qualifier which provides a way to qualify a rule based on the terminal name
- Several enhancements and bug fixes

Contact support@pointsecure.com for an upgrade or sales@pointsecure.com to schedule a demo.

In addition, PointSecure is offering *25% off all new System Detective licenses* from now until March 31, 2010. To take advantage of this special offer, please contact sales@pointsecure.com.

HOUSTON, TX—(Marketwire – December 1, 2009) – Today, PointSecure, a leading provider of security and auditing solutions for OpenVMS systems, announced a distributor relationship with Raxco UK, the leader in distribution.

- c. Synergy/DE released version 9.3 of their product last month:
<http://www.synergyde.com/news/article.aspx?id=3218>.
- d. Complementary on-demand webinar by John Apps and Attunity: OpenVMS: Keep it. Modernize it. Integrate it. This webinar covers cost-effective ways of utilizing OpenVMS data and applications across your organization. Over the years, HP & Attunity have worked together to solve many OpenVMS integration challenges. John Apps, OpenVMS Ambassador, and Attunity's Richard Thomas share their experiences with real examples and case studies covering web and legacy application integration, data integration and operational reporting and BI. [Click here](#) to access the webinar recording.
- e. eCube Systems Announces NXtera™ 6.0 High Performance RPC Middleware PR Web (press release) New platform support for NXtera 6.0 includes OpenVMS Integrity and Alpha, zLinux, and Mac OSX. Also new to NXtera 6.0 is support for Ingres 9.2 database
